

Promoting Pedestrian Safety in Wilson

The UNC Highway Safety Research Center (HSRC) is partnering with the City of Wilson to promote pedestrian safety and further its efforts in becoming a model community for walkability. This project aims to reduce pedestrian crashes and their negative impacts on the community through a sustained and comprehensive program involving roadway improvements, law enforcement efforts, and broad outreach regarding pedestrian safety issues.

ROLE OF HSRC

- Identify pedestrian safety concerns in Wilson
- Coordinate with local organizations to identify opportunities to address pedestrian safety concerns
- Provide support and technical assistance to groups addressing pedestrian safety issues
- Document and evaluate Wilson activities and share lessons learned with other communities

ROLE OF PARTNERS

The partnerships formed through this collaborative effort will be an invaluable resource. Your involvement will equip HSRC and the project working group with valuable knowledge and expertise regarding pedestrian safety concerns in Wilson.

GET INVOLVED

To get involved in the project and receive updates/announcements via the project listserv, please email Dan Gelinne (gelinne@hsrc.unc.edu). You can also visit the project web site, www.walkinginfo.org/wilson, to learn more.

For questions, please contact Dan Gelinne (gelinne@hsrc.unc.edu, 919-962-8703) or Laura Sandt (sandt@hsrc.unc.edu, 919-962-2358). This project is funded by the National Highway Traffic Safety Administration (NHTSA).
